RADA, A EXAMINER

PART UNIT

PAPER NUMBER

02/08/04

DATE MAILED:

Please find below and/or attached an Office communication concerning this application or proceeding.

Commissioner of Patents and Trademarks

Office Action Summary

Application No.

09/601,913

Applicant(s)

SAFRONOV ET AL.

Examiner

Alex P. Rada

Art Unit

3713

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-16 is/are pending in the application.
- 4a) Of the above claim(s) ____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) ____ is/are allowed.
- 6) ☒ Claim(s) 1-16 is/are rejected.
- 7) ☐ Claim(s) ____ is/are objected to.
- 8) ☐ Claims ____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on ____ is/are objected to by the Examiner.
- 11) ☐ The proposed drawing correction filed on ____ is: a) ☐ approved b) ☐ disapproved.
- 12) ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. § 119

- 13) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. ____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT, Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgement is made of a claim for domestic priority under 35 U.S.C. & 119(e).

Attachment(s)

- 15) ☐ Notice of References Cited (PTO-892)
- 16) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 17) ☒ Information Disclosure Statement(s) (PTO-1449) Paper No(s) 1.
- 18) ☐ Interview Summary (PTO-413) Paper No(s). ____.
- 19) ☐ Notice of Informal Patent Application (PTO-152)
- 20) ☐ Other:

Art Unit: 3713

DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, in claim 2, the “space vehicles having various technical characteristics”, in claim 4, the “technogenic object relating to space waste being captured on reaching position”, in claim 5, the “space vehicle which has gone the longest distance to the game event assessment device”, in claim 6, the “space vehicle which has gone the shortest distance to the game event assessment means”, in claim 9, the “External surface of a space vehicle”, in claim 9, the “surface being divided into game fields, the game elements being movable objects which are randomly moving in cosmic space and a movable object hits a game field”, and in claim 12, the “game event occurrence registration facility being adapted to detect a game event occurrence in cosmic space outside the Earth and display the game event occurrence on the Earth” that must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.
2. Applicant is required to submit a proposed drawing correction in reply to this Office action. However, formal correction of the noted defect can be deferred until the application is allowed by the examiner.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it

Art Unit: 3713

pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 1-16 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. In claims 1, 12 and 13, the specification does not show how one of ordinary skill in the art could “register a game event occurrence using a facility by a spatial position” and “the game assessment means are disposed in cosmic space out side the Earth”. It is unclear how the applicant accomplishes these processes. How do you register an event using a facility by a spatial position? How is the interest of the game captured? What is the benefit? How does the assessment means get disposed in space? What is the process?

In claim 16 the specification does not show how one of ordinary skill in the art could have “movable objects randomly moving in cosmic space”, a “registration facility being mounted on an external surface of the space vehicle and adapted to detect a game event”. It is unclear how applicant accomplishes this process and method. Applicant is reminded that natural occurrences like gravity can not be claimed.

The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make the invention appropriate with these claims.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 3713

6. Claims 1-16 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 1,3 and 5-6, these claims further define “the game event assessment means”. The independent claims from which these claims depend from refer to the game elements to at least one game event assessment means located in the same space. It is unclear as to who or what is the “game event assessment means”. What is the game event assessment means? What is its function(s)? What is the function and process? What is being assessed?

In claims 2-10 and 12-16, these claims further define a “space vehicles” and a “technogenic object”. What are the various technical characteristics? How are they used? How many space vehicles? What is the relationship to the game event assessment means? What is technogenic? What is a technogenic object? Also, these claims further define the “longest distance to the game event assessment device” Where is the start and end point? What is the game assessment device? What is the purpose?

In the specification the panel being specially oriented in space and having the same characteristics of the probability of being hit by space particles, including equal areas, the absence or equal degree of shadowing by structure components, thickness, sensitivity of sensors, response time and the recovery by spare panels. It is unclear as to how the applicant accomplishes this process. How is this accomplished? What is the process? Further, the acoustic sensors are located over a perimeter of every panel and the kinetic energy of particles can be determined by the acoustic pulse energy. It is unclear as to how applicant accomplishes this

Art Unit: 3713

process. How is this accomplished? What is the process? Where is the technical data? Examiner notes that these are only a few examples cited.

7. Regarding claim 11, the phrase "such as" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alex P. Rada whose telephone number is 703-308-7135. The examiner can normally be reached on Monday - Friday, 8:00-16:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Valencia Martin-Wallace can be reached on 703-308-1118. The fax phone numbers for the organization where this application or proceeding is assigned are 703-305-3579 for regular communications and 703-305-3579 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-1118.
